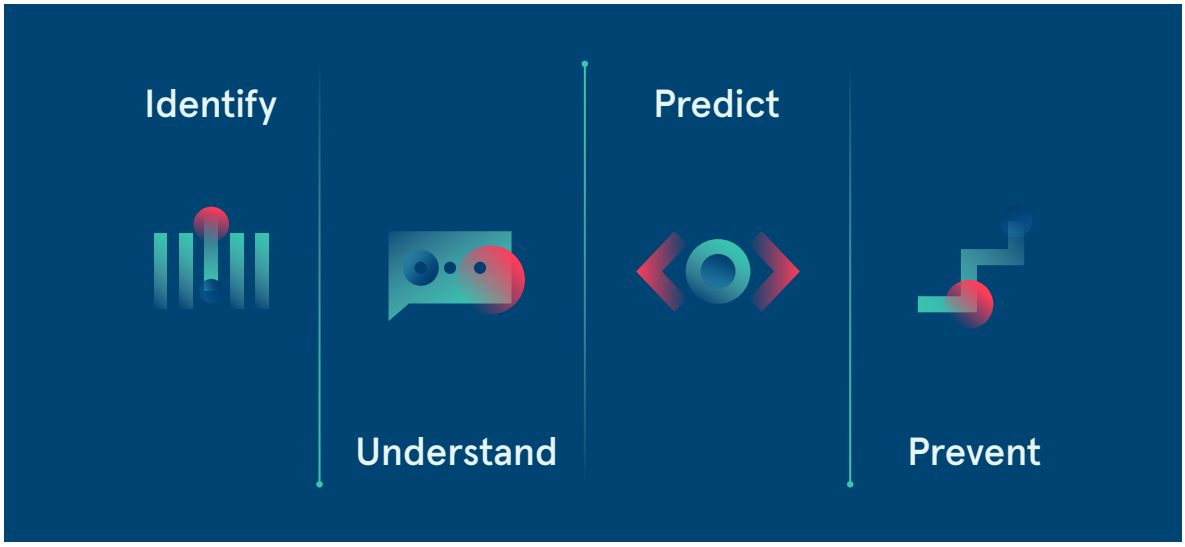
PositivityTech®

The Science of Transforming Negatives To Positives®



What your customers complain about can directly impact your P&L, driving lower revenues and increasing expenses.

Our newest groundbreaking solution, PositivityTech® Risk Indicators, tracks and monitors threats to your financial growth and stability.

Balance Sheet Risk Indicator (BSRI)
The BSRI focuses on risks to account volume, which can lower key balance sheet items.

Revenue Risk Indicator (RRI)
The RRI signals issues that may impact fees and interest, likely to drive reduced revenues.

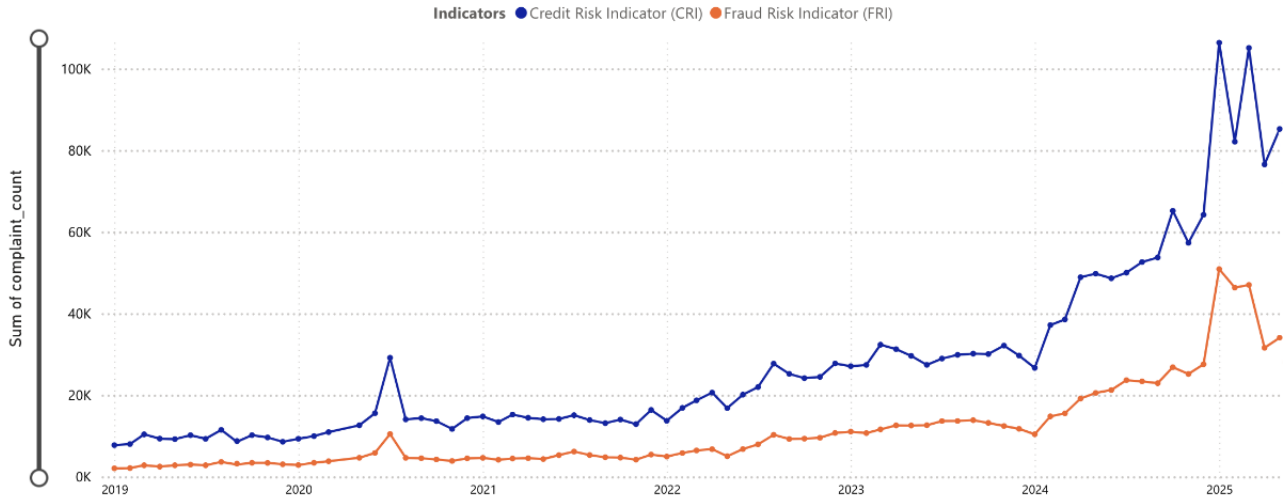
Fraud Risk Indicator (FRI)

The FRI captures trends in customer complaints relating to theft and scams, signaling an increase in fraud losses.

Credit Risk Indicator (CRI)

The CRI identifies payment challenges, a leading trigger of potential increases to credit losses.



Whether assessed individually or used in tandem, these indicators are reliable signals for future financial performance and investments.

Let's ensure you're making use of your company's greatest asset and harnessing customer complaints to protect your business, improve performance, and generate new revenue. To start recognizing and tracking financial growth risks today, connect with me at marcia.tal@positivitytech.com.
